

Jarcom Ltd - MDRP360 Configuration Options Guide

BASIC CAMERA CONTROL	<p>With a camera control cable fitted you can operate the panner, fire the camera, set exposure lock, start auto tour and Express Pan[®] from the remote controller.</p> <p>The MDRP360 control cable is a separate accessory due to the different cameras and connector types. It connects the MDRP360 to the camera remote port. The hand controller will then normally operate whatever operation the camera allows through the remote port. If zoom or manual control settings are required and unavailable through this port then refer to the Wireless USB Full Camera & Remote Video Configurations.</p> <p style="color: red;">MDRP360 Control Cable</p> <p>Up to 300' line of sight</p> <p>Parts List: MDRP360 + MDRP360 Control Cable (Select cable for your camera)</p>
BASIC CAMERA CONTROL & REMOTE VIDEO	<p>If your camera supports Live View - with a camera video cable fitted you can view what the camera sees on the remote video monitor. The right hand antenna is the transmitter.</p> <p>This option requires one MDRP360 video cable and one Remote Video Monitor accessory. In some cases you may need to additionally use the video cable from your camera.</p> <p style="color: blue;">MDRP360 Video Cable</p> <p>Up to 300' line of sight</p> <p>Up to 300' line of sight</p> <p>Parts List: MDRP360 + MDRP360 Control Cable (Select cable for your camera) + MDRP360 A/V Cable + MDRP360 Remote Video Monitor</p>
WIRELESS USB - LAPTOP / PC CAMERA CONTROL	<p>In this scenario you can control all of the camera functions available in the remote capture software package that you use. Since USB wireless is slower transmission than wired USB it is best to use the 'save to camera' option for the fastest operation. Note that it is still possible to use a Remote Video Monitor with this configuration.</p> <p style="color: yellow;">Wireless USB Cable</p> <p>Up to 300' line of sight</p> <p>Up to 100'+ line of sight *</p> <p>Parts List: MDRP360 + MDRP360 Control Cable (Select cable for your camera) + Jarcom Wireless USB Kit</p> <p><i>* This is subject to environmental conditions and longer distances are achievable with higher specification equipment</i></p> <p>Wireless USB REX Unit + Power By Battery</p> <p>Wireless USB LEX Unit + Power By Battery or Mains</p> <p>Proprietary Camera or 3rd Party Remote Capture Software</p>
